Roll Call: Chris, Maggie, Sarah, David, Ralph, Jamey, Scott, MaryAnn, Mark, Dennis

## Bike System Improvement Projects

1. We need to request that the west campus bike path approval be independent of housing approval in case CC denies housing on the bluffs.
2. Use the Committee on Committees to get the word out about the paid coordinator position. Maggie to go over AS Interest forms, get email addresses, and invite those students to the AS Bikes meeting.
3. Getting closer on getting the bike rack plan
4. Chris found and Jamey printed the campus master plan, including bike lanes and racks.
5. The Housing Study also has a bike plan. Dennis to get this from Mark's Power Point presentation and give to AS Bikes.
6. Jamey to check language at UC Davis requiring bike parking to be created for new buildings. We can insert this language and more about how bike paths and parking are impacted by construction. Campus Planning Committee has a vicechancellor that we can contact, also try Donna Carpenter as an advocate. This policy needs to be put in writing and included in the Long Range Development Plan. Need to figure out formulas to put in writing - e.g. 200 seat classroom $=$ parking need for 300 bikes.
7. Need to create a Bike Master Plan independent of Campus Master Plan, so that someone has to look at our ideas when planning construction.
8. Received $\$ 54 \mathrm{k}$ from the County for bike racks. Will have to buy the racks and then Jamey will submit request for reimbursement.
9. Jamey to write grant to County (due Dec 1) for $\$ 150 \mathrm{k}$ in matching funds to Eng II for bike projects. Money won't come until a year after proposal, so this will be part of long range plan.
10. AS Bikes requests that MaryAnn get quote to continue bike path improvement all the way to Noble. AS Bikes requests that the construction wait until Christmas break so a thorough and complete job can be done. Other ideas for this project: take out north curb and widen path, giving room for shoulder on the south side.
