

AS BIKES Committee

Minutes
August, 18th, 2010

1. Introductions

Present: Nathan Pfaff, Michell Cao, Scott Bull, Jessica Gasiorek, Keinan Williams, Dennis Whelan, Michael Strack, Maryann Johansson, Ralph Fertig

2. General Announcements

- i. This meeting was called to update the committee on summer projects and further discuss the 2010-2011 budget, West Campus Bluffs bike path, and Fall bike auction planning
- ii. Dennis announced that Peak Racks donated a set of their new diagonal style racks and has been placed at Student Health
- iii. Ralph reported that at the TAP meeting, they discussed whether Rate Payers Board and TAP should converge, despite their conflicting interests

3. AS BIKES Business

a. SRB

- i. The bike path has been repaved, restriped, and moved over to create a turning lane
 1. Turning lane improves circulation to allow people to get in and out easier
- ii. Tactile tile strips moved to be more ADA compliant
- iii. Still waiting for the rest of the racks to come in, should be completed by tomorrow

b. South Hall and Storke Circle repaving, resurfacing, and restriping

- i. Approved 25K to fund this project at our meeting on May 19th
- ii. Maryann will look into getting estimates to move on with this project
 1. Should be completed at the end of September before students come in

c. Santa Catalina

- i. Housing wants to rerack the massive bike parking lot in front of Santa Catalina with Peak Racks
- ii. Dennis provided a schematic design with the Peak Racks, which will hold 1,290 spaces
- iii. Not sure about the timeline for this project, but Housing is moving forward with it
- iv. Nathan suggested that we discuss where we could put the old racks

1. Perhaps we could use them to add parking at the Rec Cen, but it would not be as drastic of an increase as with Peak Racks
- d. Kerr parking
 - i. Approved up to 50K to fund this project at our meeting on May 19th
 - ii. Dennis also brought a schematic design for the relocation of Kerr parking to north of South Hall
 1. Parking would increase 30-40% even after the other lot goes away
 2. There might be a drip issue with the surface material under the trees
 3. The design adds landscape character by integrating trees and hedges
 - iii. Dennis assumes that the library expansion project will not have funding to add bike parking
 - e. Library
 - i. A bike circle at the library T-intersection will be put in place as part of the library infrastructure replacement project
 1. Expected to start in the fall
 - ii. Dennis brought a schematic for this design which included the circle and the reracking plan for the existing lot that will expand to the north and straighten out the lot
 1. The design of the triangle corner of the lot will change. This might also pose an illegal parking problem and people will probably park outside the fences.
 - iii. Gives us an opportunity to resurface and repave the lot and realign the racks
 - f. HSSB
 - i. Still has big illegal parking problem
 - ii. Dennis says we could add parking on the east side of HSSB by the service road, but the problem is more adjacency rather than parking
 - g. Campbell
 - i. Hedges now have openings so that people can get in and out of the racks with ease
 - h. Bren Circle
 - i. Right turn needs to be softened
 - ii. The committee decided that this is the next prioritized maintenance project
 - iii. Maryann will work on getting the estimates
 - i. West Campus Bluffs
 - i. Project is ready to go up for bid, estimating that it will be around 300K
 - ii. In addition to the path, restoration work will be done
 - iii. Coastal Fund applied for the grant and additionally has already approved 150K for this project, now asking for 40K more

1. The grant involves the stipulation that the path must be maintained for 10 years
2. Maryann thinks that we should find out how much we'll have to pay for maintenance before approving money

j. MCC

- i. The bike rack on the balcony of the MCC has been removed

4. Outreach

a. Fall Auction

- i. Date will be Wednesday, September 22nd, time is still to be announced
- ii. Michell suggested that we coincide the auction with the Fun and Fitness Festival which will be going on at the Rec Cen and will contact the organizers about this idea
 1. It's conveniently close to the CSO impound yard and there are many service roads we can use
 2. It will allow great exposure and we can advertise it alongside the Fun and Fitness Festival
- iii. Michell will advertise this event through Discovery Days

5. Adjourn
